

Santiago Martinez

Lead Business Intelligence Analyst · Data Analyst

Tokyo, Japan

santiagomwp@gmail.com

linkedin.com/in/santiagomartinez

github.com/santimuru

PROFILE

Economist by training, data professional by practice. Over 6+ years across telecom, e-commerce and consulting, building analytics infrastructure that turns raw data into real decisions: dashboards people actually use, predictive models that drive strategy, and data pipelines that keep things moving.

EXPERIENCE

Lead Business Intelligence Analyst

July 2025 – Present · Tokyo, Japan

Montecable

\$20K annual savings

Power BI Migration

LLM / GPT-4o

- Designed and deployed an LLM-powered call-quality audit system processing ~1,500 customer calls per day using OpenAI GPT-4o, replacing a manual QA process that covered less than 2% of call volume. Built the end-to-end Python pipeline (ingestion → diarized transcription → multi-dimensional LLM scoring → SQL Server → Power BI), iterated through 7 prompt versions, with operating cost optimized to ~\$8/day via prompt caching.
- Led the full migration of the BI ecosystem from Qlik Sense to Power BI on Azure cloud, rebuilding semantic models, dashboards, and deployment pipelines, saving approximately \$20K annually in licensing and infrastructure costs.

Fraud Prevention Senior Analyst

July 2024 – June 2025 · Remote (LATAM)

Mercado Libre

\$310K+ fraud prevented

Fraud Analytics

- Built classification, time-series, and graph-analysis models in Python on logistics and shipping datasets to detect fraud patterns across Mercado Libre's delivery network, contributing to over \$310K in annual loss prevention.
- Designed Tableau and Looker dashboards translating model output into actionable signals for operations and engineering teams.
- Presented findings and recommendations to senior management and regional directors.

Senior Business Intelligence Analyst

January 2021 – July 2024 · Montevideo, Uruguay

Montecable

13% churn reduction

\$113K revenue uplift

XGBoost · MLOps

- Developed churn-prediction models using XGBoost with Platt calibration and walk-forward cross-validation, prioritizing intervention targets via CLV-based ROI ranking — reducing annual churn by 13% and generating an estimated \$113K in incremental annual revenue.
- Implemented a monthly automated scoring pipeline covering ~33,000 accounts, with versioned model artifacts, PSI drift monitoring, and A/B testing to validate retention campaign impact.

Data Analyst

October 2019 – January 2021

Tata Consultancy Services

Migrated operational reporting from Excel to interactive dashboards, enabling deeper workflow analysis and supporting data-driven improvements across teams.

Junior Researcher

January 2019 – July 2019

Willis Towers Watson

Contributed to research projects at a global insurance and actuarial consultancy, collecting and analyzing structured financial and workforce datasets for comparative reports on pension obligations and workforce metrics across companies.

EDUCATION

Bachelor's Degree in Economics · Universidad Católica del Uruguay

Merit-based scholarship for academic excellence · Elective coursework in Big Data and Financial Crimes

Graduated Dec 2023

Montevideo, Uruguay

SKILLS

BI & Visualization	Power BI · Tableau · Qlik Sense · Looker Studio · Alteryx
Languages & Data	Python · R · SQL · BigQuery · Excel
AI / Machine Learning	LLM application development (OpenAI GPT-4o) · Prompt engineering · XGBoost · Time-series analysis · Graph analysis · MLOps (drift monitoring, versioned artifacts, A/B testing)
Technical Expertise	KPI Design & Dashboard Architecture · Data Pipeline Design & BI Migration
Methodologies	Agile · Six Sigma

CERTIFICATIONS

C1 Business Higher · Cambridge English | Financial Markets · Yale University / Coursera | QlikView Business Analyst | Agile Methodologies | Six Sigma
